

- 
- A scatter plot showing data points categorized by fault type. The plot features several distinct clusters of points. The 'Normal' category (orange) is the most numerous, forming a large cluster on the left and several smaller ones at the top and center. The 'SurroundingEnvironment' category (blue) is a small cluster on the right. The 'HardwareFault' category (green) is a cluster at the bottom center. The 'ParamViolation' category (red) is a cluster on the right. The 'RegulationViolation' category (purple) is a single point on the right. The 'CommunicationIssue' category (brown) is a single point in the center. The 'SoftwareFault' category (pink) is a cluster at the top center. The legend is located in the top right corner, enclosed in a box.
- SurroundingEnvironment
 - Normal
 - HardwareFault
 - ParamViolation
 - RegulationViolation
 - CommunicationIssue
 - SoftwareFault
