

- 
- A scatter plot showing the distribution of various system states. The plot is divided into several distinct clusters. The largest cluster, on the right, is orange and represents 'Normal' states. Other clusters include green ('HardwareFault') at the top, blue ('SurroundingEnvironment') on the left, red ('ParamViolation') in the middle-left, purple ('RegulationViolation') below the red cluster, brown ('CommunicationIssue') above the purple cluster, pink ('SoftwareFault') at the bottom, and a small orange cluster at the top-left. A legend in the top-right corner identifies these categories with colored dots.
- SurroundingEnvironment
  - Normal
  - HardwareFault
  - ParamViolation
  - RegulationViolation
  - CommunicationIssue
  - SoftwareFault
