

- 
- A scatter plot showing data points categorized by fault type. The plot features several distinct clusters of points in various colors. The 'Normal' category (orange) is the largest and most central, with multiple sub-clusters. 'SurroundingEnvironment' (blue) is a small cluster on the left. 'HardwareFault' (green) is at the top. 'ParamViolation' (red) is at the bottom. 'RegulationViolation' (purple) is a single point. 'CommunicationIssue' (brown) is a single point. 'SoftwareFault' (pink) is a cluster on the left. A legend box on the right lists the categories with corresponding colored dots.
- SurroundingEnvironment
 - Normal
 - HardwareFault
 - ParamViolation
 - RegulationViolation
 - CommunicationIssue
 - SoftwareFault
