

- 
- A scatter plot showing data points categorized by color and size. The plot is enclosed in a black rectangular frame. The data points are distributed across the frame, with a large, dense cluster of orange points on the right side. Other smaller clusters are visible: green points at the top center, red points on the left, purple points near the top right, brown points in the lower center, pink points at the bottom center, and blue points at the bottom left. The size of the points varies, with some being significantly larger than others, particularly within the orange cluster.
