

- 
- A scatter plot showing data points categorized by fault type. The plot features several distinct clusters of points in various colors. A legend in the bottom-left corner identifies the categories: SurroundingEnvironment (blue), Normal (orange), HardwareFault (green), ParamViolation (red), RegulationViolation (purple), CommunicationIssue (brown), and SoftwareFault (pink). The 'Normal' cluster is the largest, appearing in several locations. 'HardwareFault' points are clustered in the upper-middle. 'ParamViolation' is a small cluster on the left. 'RegulationViolation' has a few points. 'CommunicationIssue' is a single point. 'SoftwareFault' points are clustered in the bottom-right. 'SurroundingEnvironment' points are mostly within the 'Normal' and 'SoftwareFault' clusters.
- SurroundingEnvironment
 - Normal
 - HardwareFault
 - ParamViolation
 - RegulationViolation
 - CommunicationIssue
 - SoftwareFault
