

- 
- A scatter plot showing data points categorized by fault type. The plot features several distinct clusters of points in various colors. The 'Normal' category (orange) is the most numerous, forming a large vertical cluster in the upper right and several smaller groups. The 'SurroundingEnvironment' category (blue) is a small cluster on the left. 'HardwareFault' (green) is a cluster in the upper left. 'ParamViolation' (red) is a small cluster in the lower left. 'RegulationViolation' (purple) and 'CommunicationIssue' (brown) are small, isolated points. 'SoftwareFault' (pink) forms a cluster at the bottom center. A few points from other categories are scattered within the 'Normal' cluster.
- SurroundingEnvironment
  - Normal
  - HardwareFault
  - ParamViolation
  - RegulationViolation
  - CommunicationIssue
  - SoftwareFault
