

- 
- A scatter plot visualizing data points categorized by fault type. The plot features several distinct clusters of points across the canvas. The 'Normal' category (orange) is the most numerous, forming multiple clusters of varying sizes. The 'SurroundingEnvironment' category (blue) is concentrated in a small cluster on the right side. The 'SoftwareFault' category (pink) forms a diagonal line in the upper right. The 'HardwareFault' category (green) is clustered on the right side. The 'ParamViolation' category (red) has a single point near the top center. The 'RegulationViolation' category (purple) has a few scattered points. The 'CommunicationIssue' category (brown) has a single point in the lower center. The legend is located in the top right corner, enclosed in a box.
- SurroundingEnvironment
 - Normal
 - HardwareFault
 - ParamViolation
 - RegulationViolation
 - CommunicationIssue
 - SoftwareFault
