

- 
- A scatter plot showing data points categorized by fault type. The plot features several distinct clusters of points in various colors. A legend in the top right corner identifies the categories: SurroundingEnvironment (blue), Normal (orange), HardwareFault (green), ParamViolation (red), RegulationViolation (purple), CommunicationIssue (brown), and SoftwareFault (pink). The 'Normal' cluster is the largest and most widespread, appearing in multiple locations. Other clusters are more localized, with some showing overlap between categories.
- SurroundingEnvironment
  - Normal
  - HardwareFault
  - ParamViolation
  - RegulationViolation
  - CommunicationIssue
  - SoftwareFault
