

- 
- A scatter plot visualizing data points categorized by fault type. The plot shows several distinct clusters of points in various colors. A legend in the top right corner identifies the categories: SurroundingEnvironment (blue), Normal (orange), HardwareFault (green), ParamViolation (red), RegulationViolation (purple), CommunicationIssue (brown), and SoftwareFault (pink). The 'Normal' cluster is the largest, located in the center-right. 'SurroundingEnvironment' is a small blue cluster in the lower-left. 'HardwareFault' is a green cluster in the upper-left. 'SoftwareFault' is a pink cluster on the left. 'ParamViolation' is a red cluster at the bottom. 'RegulationViolation' is a single purple point, and 'CommunicationIssue' is a single brown point near the bottom center.
- SurroundingEnvironment
 - Normal
 - HardwareFault
 - ParamViolation
 - RegulationViolation
 - CommunicationIssue
 - SoftwareFault
