

- 
- A scatter plot visualizing data points categorized by fault type. The plot shows several distinct clusters of points. The 'Normal' category (orange) is the largest, forming a large cluster in the upper-left and a smaller one in the lower-left. The 'SurroundingEnvironment' category (blue) is a small cluster on the right. The 'HardwareFault' category (green) is a cluster in the upper-right. The 'ParamViolation' category (red) is a small cluster in the center. The 'RegulationViolation' category (purple) is a single point in the center. The 'CommunicationIssue' category (brown) is a single point in the lower-center. The 'SoftwareFault' category (pink) is a cluster in the lower-right. A legend in the top-right corner identifies these categories with colored dots.
- SurroundingEnvironment
 - Normal
 - HardwareFault
 - ParamViolation
 - RegulationViolation
 - CommunicationIssue
 - SoftwareFault
