

- 
- A scatter plot showing data points categorized by fault type. The plot features several distinct clusters of points in different colors: orange for 'Normal', green for 'HardwareFault', red for 'ParamViolation', purple for 'RegulationViolation', brown for 'CommunicationIssue', pink for 'SoftwareFault', and blue for 'SurroundingEnvironment'. The 'Normal' cluster is the largest and most spread out, occupying the upper and central portions of the plot. The 'HardwareFault' cluster is located in the upper right. The 'ParamViolation' cluster is in the middle right. The 'RegulationViolation' cluster is a single point in the lower middle. The 'CommunicationIssue' cluster is a single point in the lower middle. The 'SoftwareFault' cluster is in the lower right. The 'SurroundingEnvironment' cluster is in the lower left. There are also some isolated points and small groups of points scattered throughout the plot.
- SurroundingEnvironment
  - Normal
  - HardwareFault
  - ParamViolation
  - RegulationViolation
  - CommunicationIssue
  - SoftwareFault
