

- 
- A scatter plot showing the distribution of various system states. The plot features several distinct clusters of points, each color-coded according to a legend. The 'Normal' cluster (orange) is the largest and most central, forming a large, elongated shape. Other clusters include 'SurroundingEnvironment' (blue) at the bottom center, 'HardwareFault' (green) on the left, 'ParamViolation' (red) at the bottom left, 'RegulationViolation' (purple) near the bottom center, 'CommunicationIssue' (brown) near the bottom center, 'SoftwareFault' (pink) at the top, and a smaller 'Normal' cluster (light orange) at the top right. A few individual points are scattered throughout the plot area.
- SurroundingEnvironment
 - Normal
 - HardwareFault
 - ParamViolation
 - RegulationViolation
 - CommunicationIssue
 - SoftwareFault
